Study title: Ethical oversight in online data sharing platforms (Data sharing and ethical oversight)
Principal Investigator's Name and First Name: Prof. Dr. Effy Vayena

The **goal** of this survey is to collect information on how you perceive ethical oversight on online data sharing platforms. **You will be asked** to answer questions on your past data sharing **experience**, your **beliefs** regarding data sharing, and your **opinion** on the mechanisms of application of the main ethical principles in online data sharing platforms. The project has **no access to your personal Open Human data** and only identifies you via randomized project member ID. Therefore you will also be asked question about demographic data.

The study has been founded by the Swiss National Science Foundation (SNSF). Only the principal investigators and their collaborators will have access to the original data under strictly observed rules of confidentiality. Your answers to the survey will be stored safely and reported in anonymous form.

Completion of the following survey will last approximately 15 minutes. You can participate if you have an account on openhumans.org, no matter when you opened it. You will be exposed to no risks by participating. The survey is planned to be open for one month.

You will receive no compensation for participation. However, if you wish, we will send you an email with your own answers to this survey and/or another dataset with the participants' aggregated answers. This way, you can compare your own answers with those of the other participants. **You have the right to withdraw from the study at any time without specifying reasons and without any consequences.**
